Anglian Building Products

Location: Chesterfield, East Midlands

Contract installation of PVC-U windows and composite doors for Chesterfield Borough Council
Project

Anglian Building Products are appointed to LHC’s PVC-U Windows and Doors framework and have been awarded a contract valued at a total of £1.6 million. This contract is with Chesterfield Borough Council, through the agreement, for the installation of windows and doors across Chesterfield.

The project saw works to a range of property types including Reema non-traditional construction properties, in advance of an external wall insulation installation programme.

Over the term of the 14 month contract, Anglian supplied and installed PVC-U ‘A’ rated windows and composite doors to properties across Chesterfield. Residents were in occupation throughout the works so it was vital that a high standard of resident engagement was maintained.

The new windows and doors have been well received by the residents, who are enjoying smarter, warmer and more secure homes.

“Anglian have been involved in our window and door renewal programme through LHC’s PVC-U Framework for over 12 months, as part of a wider multi-million investment we are making to improve the quality of the council homes that we manage for our tenants.”

Richard Furniss
Contracts Supervisor, Chesterfield Borough Council

About Anglian Building Products

Anglian Building Products is the large project division of Anglian Windows Ltd. The division specialises in providing a range of fenestration, doors and insulation services to a diverse range of markets.

Anglian operates throughout the UK and has a turnover in excess of £200m and employs over 2000 employees.

“We are delighted to have been invited to work with Chesterfield Borough Council through LHC’s PVC-U Framework. We have formed a very healthy partnership and look forward to a long and lasting relationship.”
